EDUCATION

SRM University of Science & Technology, Kattankulathur
B.Tech CSE — AI & ML
Expected 2028
CGPA: 8.52 / 10
Class XII: 95.4%
Class X: 90.4%
Relevant Coursework:
Data Structures & Algorithms, DBMS, OOP, Statistics, Linear Algebra

TECHNICAL SKILLS

Java
Python
C
MySQL
JDBC
Machine Learning
REST APIs
NumPy & pandas
scikit-learn
Matplotlib

CERTIFICATES

Oracle Certified — Java SE 21
Completed

Programming in Java — NPTEL
IIT Kharagpur (Elite, 71%)
Jul–Oct 2025

Tata GenAI Powered Data Analytics Job Simulation
Forage · Sept 2026

PROFESSIONAL SUMMARY

Driven Computer Science undergraduate specializing in AI & ML, backed by a strong academic record (8.52 CGPA, 95.4% in Class XII). Hands-on experience building an AI-powered resume matcher with sentence-transformers and Streamlit, alongside full-stack Java web applications (JSP/Servlets, JDBC, MySQL) for complaint management and airline reservation platforms. Holds a completed Oracle Java SE 21 certification and an NPTEL (IIT Kharagpur) certification in Programming in Java. A fast learner, dependable problem-solver, and eager to learn new things, always looking to bring technical rigor and fresh ideas to a challenging engineering role.

PROJECTS

Resume Matcher — AI-Powered Resume/JD Match Scorer *Python · Streamlit · Sentence-Transformers · scikit-learn · PyPDF2*

- Built a Streamlit web app that scores resume-to-job-description fit using Sentence-Transformer embeddings (all-MiniLM-L6-v2) and cosine similarity, returning an instant 0–100 match score.
- Implemented PDF resume parsing and text cleaning (PyPDF2) and a keyword-based skill-gap detector that flags skills present in the job description but missing from the resume, across a 25+ term technical skill list.
- Designed a polished, responsive UI with custom CSS — gradient headers, color-coded match verdicts (strong/moderate/low), and skill pills — for an intuitive, at-a-glance user experience.
- Structured the codebase into clean, reusable modules (extraction, matching, app layer) for easy extension of the skill list and scoring logic.
- Deployed and live at resume-matcherz.streamlit.app.

Online Complaint Management System *Java · JSP/Servlets · JDBC · MySQL*

- Built a full-stack web application using JSP and Servlets for the presentation and controller layers, with JDBC handling direct SQL-based interaction with a MySQL backend.
- Engineered a role-based access system for admins and users, ensuring secure, structured workflows across the complaint lifecycle — submission, status tracking, and resolution.
- Designed the relational schema and wrote parameterized JDBC queries for reliable storage and fast retrieval of complaint records, guarding against SQL injection.
- Implemented server-side form validation and session-based authentication to keep user and admin actions properly scoped and secure.
- Structured the project using MVC principles — separating servlets (controllers), DAO classes (data access), and JSP views — for maintainable, testable code.

Airline Management System *Java · JSP/Servlets · JDBC · MySQL*

- Developed a web-based reservation system with JSP/Servlets on the front end and JDBC-driven MySQL queries for flight schedules, bookings, and passenger data.
- Implemented CRUD operations and a normalized relational schema, using JDBC transactions to keep booking and seat-availability data consistent under concurrent updates.
- Built search and booking flows allowing users to filter flights by route and date, and to reserve seats with real-time availability checks.
- Applied core software engineering principles — separation of concerns between servlets, DAO classes, and JSP views — for a maintainable architecture.
- Handled edge cases such as overbooking prevention and cancellation/refund logic to keep the reservation data trustworthy.

WHY I STAND OUT

- Consistently high academic performer across all levels of education — top-tier scores in Class X, XII, and undergraduate studies.
- Actively practices data structures & algorithms on LeetCode across Python and Java, with focus areas in Dynamic Programming, Binary Search, and Backtracking.
- Multi-language proficiency (Java, Python, C) enabling versatile, cross-domain problem solving.
- Self-driven learner with completed Oracle Java SE 21 and NPTEL Programming in Java certifications, achieved ahead of graduation.
- Hands-on builder mindset — translates theoretical CS/AI-ML knowledge into functioning, real-world applications.
- Eager to learn new things, with a genuine curiosity that drives continuous growth across languages, tools, and technologies.
